

Model VD 56 | Vacuum drying chambers for non-flammable solvents

BINDER's VD series vacuum drying chambers deliver impressive performance through their precise temperature control and gentle drying. The patented expansion rack technology from BINDER also optimizes heat transfer. The shelves can be repositioned for flexible placement and the interior of the chamber is easy to clean.

BENEFITS

- · Fast, gentle drying
- · Optimum heat transfer through large thermal conducting plates
- · Safe work thanks to proven safety concept
- Also option of modular complete system with vacuum pump and pump chamber

Model 56

IMPORTANT FEATURES

- Temperature range: +9°C above ambient temperature to +220 °C
- Controller with digital display of pressure and temperature
- Program-controlled drying monitoring with automatic ventilation at end of
- Internal data logger, measured values can be read out in open format via USB Large viewing window with option of interior lighting
- 1 aluminum expansion rack, can be custom-positioned

- · Inert gas connection
- Universal access port DN 16 for the introduction of external measuring
- · Shatterproof, spring-mounted safety glass panel
- Computer interface: Ethernet

OPTIONAL EQUIPMENT

- Touchscreen Controller Graphical display of main process parameter
- Expansion racks Choice of aluminum or stainless steel racks depending on the application requirements
- Analogue output for temperature and pressure signals for external monitoring and evaluation of the process parameters, integration into inhouse systems is possible
- · Universal ventilation Selection of different ventilation by air or inert gas
- Universal access port DN 40 for the introduction of external measuring devices
- Multi Management Software APT-COM Manage, record and document device parameters
- Services extensive services ensure correct device function

All technical data is specified for unloaded units with standard equipment at an ambient temperature of +22 °C ±3 °C and a power supply voltage fluctuation of ±10%. The temperature data is determined in accordance to BINDER factory standard following DIN 12880, observing the recommended wall clearances of 10 % of the height, width, and depth of the inner chamber. All indications are average values, typical for units produced in series. We reserve the right to change technical specifications at any time.
