

The new Cruma G-1 is perfect to remove low quantities of gaseous polluting agents and/or solid particles/aerosols from its working area in a simple, secure, efficient and cost effective way, protecting both the user and the environment.

Cruma G-1 ductless fume hood uses the patented Cruma Filtration System, without any exterior duct connection. All molecular and dust particles are absorbed and retained into the filtration system.

CERTIFIED –Made in Barcelona and certified by an external laboratory according to international standards, and complying with the criteria of ISO 9001 standard.

PLUG&PLAY –It is sent from our warehouse assembled, and when unpacked it just needs to install the filters and connect into a plug.

FLEXIBLE –It can be used in hard-to-duct areas such as the center or bottom level of multi-level buildings.

TURNKEY –Installation expenses are far less than traditional hoods because no ductwork and remote blower are required.

GREEN & SUSTAINABLE –Unlike traditional fume hoods, costly tempered room air is not exhausted from the laboratory, resulting in lower energy costs.

NEW FEATURES

More information on the new LCD display

- √ New size 127x34mm display
- √ Air speed continuously monitored
- $\checkmark\,$ Type of filter installed, working hours, expiration date and next revision date
- \checkmark Open door warning through electronic photocell
- √ Countdown timer
- $\checkmark\,$ Clock and calendar

New features and components

- $\checkmark\,$ Initial air flow cycle adequacy and final purge cycle
- √ Fault LED
- \checkmark Control of air flow through Microprocessor
- \checkmark Activated carbon filters with electronic chip
- √ Internal temperature sensor
- √ LED illumination

New alarms and scheduled warnings

- √ Open door warning
- \checkmark Open door in off mode warning
- √ 60h of filter use warning
- \checkmark Next validation warning
- \checkmark Few hours of filter life warning
- √ Countdown timer warning
- √ Expired filter alarm (by hours)
- √ Expired filter alarm (by date)
- √ Temperature alarm
- √ Equipment without filter alarm
- √ Low barrier alarm

Because we are convinced of the quality of our products.

General chemistry involving small volumes of reagents or chemical compounds at ambient/moderate temperature in all types of laboratories:

Q (3) + m

- √ Research laboratories
- \checkmark Quality control laboratories
- \checkmark Clinical and hospital laboratories
- \checkmark University and school laboratories
- ...In general, in any kind of laboratory.

TECHNICAL FEATURES			
Number of filtration columns		1	
Number of filters		1 to 3	
Number of IP44 fans		1	
Average volume of treated air		160 m³/h	
Average face velocity		0,50 m/s	
Internal volume of the cabinet		0,32 m ³	
Renewals inside the cabinet / min		8,13	
Total electrical power consumption		60 W	
Voltage-Frequency		110-220 V / 50-60 Hz	
LED light intensity		1275 lux	
Noise level		54 dB	
Packaging: 100% recycled wooden box	Volume	0,80 m ³	
with international phytosanitary certificate	Weight	95 Kg	

SIZES (m	m)				
External Dimensions		Internal Dimensions			
Width 797	Depth 650	Height 1195	Width 776	Depth 600	Height 762

Electronic circuit with large Security levels: level 1 for users and level 2 for format LCD screen maintenance users Electronic anemometer Electronic sensor monitoring continuously air face device velocity Photocell sensor device Electric device with open door alarm for open door detection Electronic control device The filters incorporate a chip with USB connection that for filters replacement identifies the type of filter installed and the expiry date LED Tube high light intensity and low power consumption - 16 Watts / 1500lm Illumination Temperature sensor Continuous monitoring of the temperature inside the cabinet Sampling system to analize the filtered air at the exhaust To detect the level of filter saturation 60 hours alarm Countdown timer according to French NF X 15-211:2009 Electronic cronometre To program the work inside the fume hood with audible alarm Clock and calendar Display of date and time Working surface 1 Spill retention tray (2-10 liters) with working surface in white tempered glass G4 Prefilter G4 class pre-filtering blanket of synthetic biofibres (according to EN-779) for the retention of atmospheric dust

Access to the rear wall for cables and / or services entry

Guide of retained products by type of filter

7 years

OPTIONAL EQUIPMENT				
Movilair	Stand with wheels and internal tray in Epoxy coated steel			
Tubular steel stand	Support stand in Epoxy coated steel			
Working surface 2	Spill retention tray (2-10 liters) with working surface in inox steel			
Voltage / Frequency	125 V / 50 Hz			
Filter test kit	Dräger pump with reactive colorimetric tubes (pack 10u)			

MAIN STRUCTURE	
Metal parts: base frame, rear wall and head	1.2 mm galvanized coated steel with anti acid polymer resin powder heat-hardened at 200 °C
Front and side panels	Transparent polymethylmethacrylate 6 mm thick (light transmission of 93%)

Cable entry holes (2)

SERIAL EQUIPMENT

FILTER TYPES			
Туре А	For organic vapors such as ketones, ethers, alcohols, xylenes Eventually it can be used for inorganic acids, but only if used in small quantities because this activated carbon is not impregnated and the excess of acid vapors could saturate it quickly.	Туре К	For NH₃ vapors and amines ; also good for other organic compounds. Carbon with metal salt complexes impregnation.
Туре ВЕ	For inorganic acid vapors as H ₂ SO ₄ , HCl, HNO ₃ , and volatile sulfur compounds such as H ₂ S, SO ₃ , It can be used with organic vapors because the activated carbon incorporates impregnation of metal compounds and neutralizing salts. It is also suitable to filter organic and inorganic compounds when they are in similar proportions.	Туре АВЕК	Mixed type to be used when the ratios between organic, inorganic and NH ₃ /amines are similar.
Туре F	For formaldehyde vapors and derivatives; also good for other organic compounds. Carbon impregnated with KI, so that it should never be used with inorganic acid vapors.	Туре D	HEPA H-14 filter (High Efficiency Particulate Air, according to EN-1822: 2010) for filtering dust and smoke particles.

MODULAR FILTRATION COLUMN FOR GASES AND PARTICLES (according to NFX 15-211:2009)
